

xeBits Card Referral Email

Subject: Jane, I found something cool for networking

Hey Jane,

I hope you're doing great! I have something awesome that I think you would be interested in!

I started using the **xeBits Digital Business Card** and I have found it to be one of my most important tools in my business.

Here is the link to my card: <https://xebitscard.com/7/x1/sample/>

I know, sounds kinda techy, but hear me out. It's super easy to share with anyone, anywhere - no paper involved. It's been a lifesaver for me because I don't need to remember to grab business cards or reprint them.

The best part?

I got a hook-up for a **FREE Digital Card Trial**, and I can share it with friends, so here I am, sharing the love with you.

Here's the deal - you get **DOUBLE** the time for a FREE TRIAL (30 days vs 15) and if you like the card and want to keep it, you get **50% OFF the price!** You don't even need to put in a credit card to get the free trial.

So to get this awesome deal, you **CLICK HERE**, sign up, customize your card, and you're done. No strings attached. Try it for free, and who knows, it might just make networking a bit less of a headache (and alot more fun) for you too.

(NOTE: You will need this special Passcode: *****)

I've been using it for a bit now and it's actually pretty cool. You can customize your card to fit your vibe and easily share your contact info, socials, whatever you want, all in one place. Learn more about it on their [Website](#)

Anyway, I just thought it was something worth sharing. If you end up trying it out, let me know what you think. Would love to hear if it makes your networking game any smoother.

Catch you later,

Your Name

P.S. Some cool things I like about Digital Cards.

- Fully Customizable: Make it truly yours. Add your flair and style to stand out.
- Always with You: Never run out or forget them at home. It's digital, so it's always on hand.
- Eco-Friendly: Save the trees! Digital cards mean less paper waste.

Imagine sharing your contact details, social links, and more with just a tap or click—no more old-school paper cards that get lost or thrown away.

Interested? **CLICK HERE** and let's get you set up with your own Digital Business Card.
